

Colloidal Silver Concentrate

Code: 111

Package Size: 4 ounce bottle

Suggested Use: Dilute with 12 ounces of distilled water, hold 20 drops under tongue for one minute, then swallow and follow with a glass of water or juice, 1 time daily or as needed.

Nature's Antibiotic - *The ultimate universal antibiotic*

The strongest, safest, broad-spectrum antibiotic known to man

Prior to 1938, Colloidal Silver was considered to be one of the mainstays of antibiotic treatment. It is still considered to be the most universal antibiotic substance that is non-toxic in its microconcentrations of 3-5 ppm. It has been proven to be useful against over 650 different infectious conditions, as compared to traditional antibiotics, which are effective against 6-7 conditions.¹

The comeback of silver in medicine began in the 1970's. The late Dr. Carl Moyer, chairman of Washington University's Department of Surgery, received a grant to develop better treatments for burn victims. Dr. Harry Margraf, as the chief biochemist, worked with Dr. Moyer and other surgeons to find an antiseptic strong enough, yet safe enough to use over large areas of the body. As a result of their efforts, and that of other researchers, hundreds of important new medical uses for silver were found.² Colloidal Silver is the only form of silver that can be used safely as a supplement. It is absorbed into the tissues at a slow enough rate that it is not irritating to the tissues, unlike silver nitrate, which reacts violently with body tissues because of its caustic action.³ The colloidal particles diffuse gradually throughout the blood and give prolonged therapeutic action.⁴

Many forms of bacteria, fungus, and virus utilize a specific enzyme for their metabolism. Silver acts as a catalyst, effectively disabling the enzyme. It is toxic to all species tested of fungi, bacteria, protozoa, parasites, and many viruses.⁵ To primitive life forms, silver is as toxic as the most powerful chemical disinfectant.

There is no known disease-causing organism that can live in the presence of even minute traces of the chemical element of simple metallic silver. Based on laboratory tests, destructive bacteria, virus, and fungus organisms are killed within minutes of contact.

E.M. Crooks stated that Colloidal Silver kills pathogenic organisms in three or four minutes upon contact. In fact, there is no microbe known that is not killed by Colloidal Silver in six minutes or less, and there are no side effects whatsoever from the highest concentration.⁶

Colloidal Silver is effective against infections, colds, influenza, and fermentation. Parasites are also killed while in their egg stage. It is tasteless, odorless, and non-toxic. It is effective with meals as a digestive aid - no fermentation of food in the intestine. A.B. Searle has pointed out that one important advantage of using Colloidal Silver is that it has no recorded side effects. It also does not stain the skin, unlike certain pharmaceutical preparations of silver that do stain the skin quite strongly.⁷

Dr. Leonard Keene, A.M.M.D. (Johns Hopkins), concluded that from a therapeutic point of view only the colloid metals present the necessary homogeneity, minuteness of granules, purity, and stability for maximum health. One critical indicator of the quality of Colloidal Silver is its color. As the size of the silver particle gets larger, the color of the suspension ranges from yellow to brown to red to gray to black. The ideal form of Colloidal Silver is a "light golden yellow color."⁸

Colloidal Silver has been well documented to be the best broad spectrum antibiotic available. The reason it has not been more widely used is because of the high cost of production. Retail price has ranged from \$100 to \$200 an ounce. With the advancements in the manufacturing process in recent years, the average person can afford to take advantage of this wonderful product. Colloidal Silver is now an economical and effective source of silver for maintaining good health and preventing many illnesses.

As nature intended

Silver occurs naturally in the soil as a trace mineral and, as such, is one of many essential elements required by plants, animals, and man that we once naturally obtained from organic soils via fruits, vegetables, nuts, grains, and legumes. Now, with most of our crop plants grown on highly depleted, chemically fertilized soil, many of the important metallic minerals like iron, zinc, copper, magnesium, and chromium, and trace minerals like silver and gold are no longer readily available to us except through the use of mineral supplements.

Dr. Gary Smith, a medical researcher, suggests that silver may be linked to the proper functioning of the body's natural defense system and that people with an inadequate intake of silver may be more prone to illness.

Medical tests indicate no known adverse effects from the use of properly prepared Colloidal Silver and there has never been a recorded case of drug interaction with any other medication.

Some lab tests have shown that "true" Colloidal Silver has little effect on 'friendly' bacteria while being highly useful against infections and eliminating various microbes, viruses, fungi, etc.

Silver used by NASA

NASA researched 23 different methods of water purification and selected a silver system for the space shuttles. Not only does NASA use the silver system, but half of the world's airlines use silver water filters to guard against water-borne diseases. There are many practical uses for Silver including Colloidal Silver as an all-natural antibacterial alternative.

Colloidal Silver was widely used in the U.S. 60 to 70 years ago as an anti-bacterial and, in fact, was approved by the FDA in the 1920's. Although silver had an excellent reputation as an effective infection fighter, its utilization grew impractical. Current dollars would put the price of Colloidal Silver in the 1930's at nearly \$100 per ounce, limiting its widespread use at the time.

Colloidal Silver uses before 1938

The following is a list⁹ of some of the (pre-1938) documented uses of silver, particularly in the colloidal form, for the treatment of various conditions and pathogens:

Acne	Arthritis
Athlete's Foot	Bladder Inflammation
Burns	Blood Poisoning
Cancer	Cholera
Conjunctivitis	Cystitis Dermalitis
Diphtheria	Dermatitis
Diabetes	Dysentery
Eczema	Fibrositis
Gastritis	Gonorrheal Herpes
Ear "Affections"	Eustachian Tubes
Impetigo	Influenza
Intestinal Trouble	Keratitis
Leprosy	Lupus
Lymphagitis	Malaria
Menier's Symptoms	Meningitis
Neurasthenia	Ophthalmology
Canine Parvo Virus	Pneumonia
Pleurisy	Prostate
Pruritis Ani	Rheumatism
Ringworm	Rhinitis
Scarlet Fever	Seborrhea
Seplicemia	Skin Cancer
Shingles	Soft Sores
Staph Infections	Strep Infections
Syphilis	Tuberculosis
Tonsillitis	Toxemia
Trachoma	Trench foot
Ulcers	Viral Warts
Whooping Cough	Yeast Infections

The Food and Drug Administration has stated that because Colloidal Silver is (by 50 years) a pre-1938 drug, it may be marketed (as per a September 13, 1991, letter received from Consumer Safety Officer, Harold Davies, U.S. Food and Drug Administration). Moreover, the FDA has no jurisdiction regarding a pure, mineral element.

Jim Powell reported in a Science Digest article - March 1978, titled *Our Mightiest Germ Fighter*, "Thanks to eye-opening research, silver is emerging as a wonder of modern medicine. An antibiotic kills perhaps a half-dozen different kinds of disease organisms, but silver kills some 650. Resistant strains fail to develop. Moreover, silver is virtually non-toxic." Pioneering silver researcher, Dr. Harry Margraf of St. Louis concluded: "Silver is the best all around germ fighter we have."

Prior to 1938, COLLOIDAL SILVER was considered to be one of the mainstays of antibiotic treatments. Colloidal Silver was administered in just about every way that modern drugs are administered. It was injected both intravenously and intramuscularly, used as a gargle for throat conditions, as a douche, taken orally and applied topically, even for sensitive tissues, and dropped in the eyes. When antibiotics were discovered, clinical uses for Silver as an antibiotic were discarded . . . UNTIL NOW!!

COLLOIDAL SILVER Kills Over 650 Different Disease-Causing Germs.

- ◆ Resistant strains fail to develop.
- ◆ Medical tests indicate no known adverse effects from the use of properly prepared Colloidal Silver.
- ◆ There has never been a recorded case of drug interaction with any other medication including prescription drugs.

Colloidal Silver is Tasteless, Odorless, and Non-Stinging To Sensitive Tissues.

- ◆ It may be taken orally or put on a bandaid and applied directly to cuts, scrapes, open sores, burns, warts, or used to rinse acne, eczemas, and skin irritations.
- ◆ It may be gargled, dropped into the eyes or ears, used vaginally, anally, atomized, or inhaled into the nose or lungs.

Read the following very carefully

From extensive research and experiments with Silver in medicine, Dr. Robert O. Brecker, M.D., concluded that silver deficiency was responsible for the improper functioning of the immune system and that silver was doing something more than killing disease-causing organisms. It was also causing major growth stimulation of injured tissues. Burn patients and even the elderly patients noticed more rapid healing and he discovered that all cancer cells changed back to normal. All strains of pathogens resistant to other antibiotics are killed by silver. Yet, at this time, he could not find silver supplements on the market.

Dr. Bjorn Nordstrom, of the Karolinska Institute, Sweden, has used silver in his cancer cure method for many years. He said the whole thing was quite simple. This has brought remission in patients who were given up on by other doctors.

Dr. Gary Smith, a medical researcher, suggests that silver may be linked to the proper functioning of the body's natural defense system.

Safe and Effective

Silver is considered to be one of the most universal antibiotic substances known. Oligodynamic Silver is as toxic to primitive life forms, as the most powerful chemical disinfectants. This, coupled with its relative harmlessness to animate life, gives it great potential as a disinfectant.

All harmful bacteria, fungi, and viruses are

killed within 6 minutes of contact with silver and no disease organism can live in the presence of even minute traces of Silver!!!

Tests prove, due to the high absorption of silver in the small intestine, the friendly bacteria in the large intestine are not affected.

Most important qualities

- ◆ Helps reduce inflammation and promotes growth stimulation of injured tissues.
- ◆ Is a remedy for infections.
- ◆ Helps strengthen the body's natural defenses (when taken daily).
- ◆ Helps promote rapid healing.
- ◆ No known toxicity or side effects.
- ◆ May be used internally or topically.
- ◆ Made from the pure mineral element, silver (Contains NO chemicals).

Dynamic Characteristics

- ◆ One of the safest and best all-around germ fighters known.
- ◆ Safe to use, even with children.
- ◆ No recorded reaction with prescription drugs.
- ◆ Tasteless, odorless, safe to use in the eyes and ears.
- ◆ Body develops no known dependency or intolerance.
- ◆ Safe to use, even with children.
- ◆ One of the safest and best all-around germ fighters known.
- ◆ No recorded reaction with prescription drugs.
- ◆ Tasteless, odorless, safe to use in the eyes and ears.
- ◆ Body develops no known dependency or intolerance.
