Colon Cleanse and Support

Better Health Through Common Sense.

More and more, people are taking responsibility for their health into their own hands, and make no mistake, that's where the responsibility lies! Importantly, we can influence our health dramatically, achieving better body function and health, through common sense and supplementation to help protect ourselves and prevent disease. With this in mind, a mistake many people make is to overlook the most critical system in the body to support good health – the digestive system.

Good health is a desire we all have and share. Many are turning to supplementation as they become more aware of the need in today's world. Some will spend time and effort on dieting and exercise, but that is not enough to make the difference. A key issue to long term health and homeostasis is a properly functioning digestive system. It is often overlooked, and seldom talked about. Many people spend money on high quality foods and superior supplementation, only to miss their benefits due to a poor functioning digestive system. Nutrients are absorbed in our intestines. Toxins and digested food mass are collected for elimination in the colon. In a poor functioning digestive system, not only are we missing the ability to absorb valuable nutrients, but we are re-introducing toxins and poisons back to our system by not eliminating waste properly and efficiently.

Toxic waste builds up in our colons through poor nutrition and bowel habits. This waste impairs the colon's ability to assimilate properly the minerals and vitamins we need. A buildup of material along the colon wall causes sluggish bowel movements, constipation and other problems. The poisons resulting from this waste re-enter and circulate in the blood stream, making us feel tired and depleted. The removal of this harmful waste from our bodies becomes an important element in our goal of achieving optimal physical and mental health.

Three Ways Maintain Good Digestion

There are three main categories of products for digestive health:

- Colon-cleanse products — which are designed to stimulate the colon to release and eliminate refuse that has built up in the system.
- Fiber products — to boost consistent fiber intake, which helps to absorb toxins and eliminate them out of the system.
- Probiotic formulas — to help establish, nourish and maintain the natural flora, which is absolutely essential to a healthy digestive system. Flora is the good bacteria that is vital to our digestion.

All three functions are important and necessary, but most products do not address the need for all three!

Fiber Source 7 Is A Complete Product!

Product Code: 144

300 grams per container.
(About 22 servings)

Serving Size:
One Scoop (13.4 grams)

Flavor:
Delicious Raspberry

Suggested Use:
Twice daily, or as needed.

Directions:
Mix one level scoop into a minimum of 8 ounces of water or your favorite beverage.

Nutritional Panel

Servings Per Container:	22
Serving Size: 1 Level Scoop	13.4 grams
Calories	20†
Dietary Fiber	7 grams*
Soluble Fiber	6 grams*
Carbohydrates	5 grams
Fat	0 grams

Calories from Carbohydrates & Psylliums†
Daily Values not Established*

Ingredients:
Proprietary Blend of Fructose, Psyllium Seed, Psyllium Husk, Guar Gum, Flaxseed, Biogenesis 1™, Cranberry, Buckthorn, Bentonite, Alfalfa, Prickly Pear, Black Walnut Leaves, Natural and Artificial Flavors*.

"Few of us realize that failure to effectively eliminate waste products from the body causes so much fermentation and putrefaction in the colon that the neglected accumulation of waste can, and frequently does, result in a lingering demise!"

— Dr. Norman W. Walker, D.Sc., Ph.D.

Fiber Source 7™

**Foundational
Product**

Biogenesis 1™ – Proprietary Ingredient of Fiber Source 7

Some supplements use lactobacillus acidophilus, or l-salivarius to support beneficial flora. Informed health professionals suggest that this is “old school technology.” Biogenesis 1 replaces “old school” ideas with a much more powerful proprietary blend of probiotic microbes, representing the “new school” of thought! The beneficial bacteria from Biogenesis 1 can add enough good microorganisms to overcome the deleterious ones, restoring order to digestive activity. Research on Biogenesis 1 shows this proprietary blend of natural flora and by-products has natural broad-spectrum antibiotic properties. Several blood studies found it to boost immune function in human cells, causing them to produce more antibodies and other substances. Biogenesis 1 works in two ways. The first is killing harmful bacteria, and the second is boosting immunity. In several tests on humans with normal blood cholesterol, Biogenesis 1 has lowered blood cholesterol from five to ten percent within a week, and has also raised the HDL (beneficial) cholesterol. In a controlled study on Biogenesis 1, six-week old rabbits receiving Biogenesis 1 daily gained 27% more weight, and consumed 6% less feed than the controls. In dairy cow studies, the milk butterfat has been reduced, and the protein content increased!

Use Fiber Source 7 twice daily to restore and maintain your digestive system — your nutrition *depends* on it!

Companion Products

AnOx

Use together as a midday booster, or if you miss a meal. Eliminate hunger pangs while maintaining optimum nutrition.

Energy Slim, AP-300 , Maca Gold

Use Fiber Source 7 before meals to maximize your weight loss plan. These products work synergistically to accelerate results.

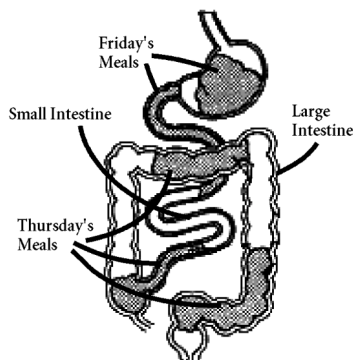

M-E-C

Use regularly with Fiber Source 7 for maximum digestive health and support of probiotic activity.

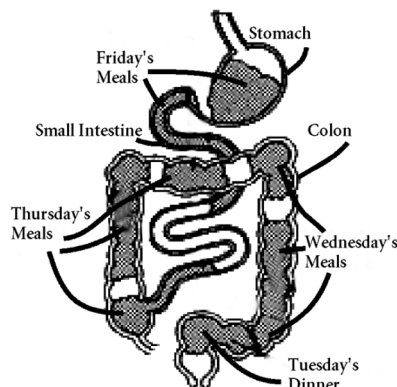

Super-C Vitamin C Crystals

Restore colon health and re-establish peristalsis. Eliminate constipation and effectively absorb and transport harmful toxins from the body. Works synergistically to detoxify and reclaim health.

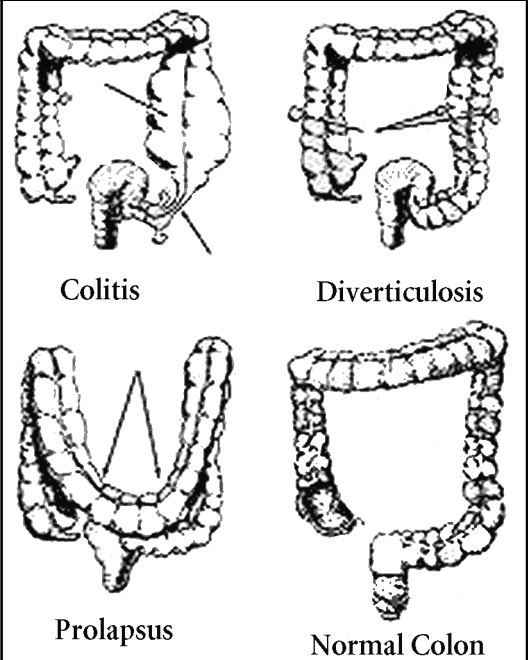

Healthy Function

Poor Function

Colon Health Is Priority One
