INGREDIENTS

Each gelatin capsule contains 240 mg. of 100% whole beam North American elk antler.

CANADIAN POLICE TEST PERFORMANCE E-V

Dr. Brian Fisher of University of Alberta conducted a research project involving 18 male recruits with the Edmonton Police Service. Dr. Fisher found that the consumption of six E-V1 (the Canadian name for Performance E-V, capsules daily increased plasma testosterone above normal levels. Tests revealed that testosterone levels rose very quickly with the ingestion of E-V1, and once the subjects stopped, testosterone levels fell back to normal very quickly.

EXPERT OPINION

“Testosterone is far more than just a sex hormone. Testosterone travels to every part of the human body. There are receptors for it from your brain to your toes. Testosterone is vitally involved in the making of protein, which, in turn forms muscle. Testosterone is a key player in the manufacture of bone. Testosterone improves oxygen uptake throughout the body, vitalizing all tissues. Testosterone helps control blood sugar, helps regulate cholesterol, helps maintain a powerful immune system. Testosterone appears to help in mental concentration and improves mood. Testosterone is most likely one of the key components in protecting your brain against Alzheimer’s disease. The male hormone is dynamite. Don’t leave home without it!”

Dr. Eugene Shippen M.D.
Author of
“The Testosterone Syndrome”

The earliest record of therapeutic use of velvet antler was found on a silk scroll in a Han tomb in China dating approximately 168 BC. The scroll suggests several medical treatments for 52 different diseases.

Performance E-V continues the tradition of making believers with what For♦Mor feels is the finest velvet antler available.

The protein composition of velvet antler is reported to include 25 different amino compounds including all the essential amino acids. Each capsule contains nutrients that our bodies require on a daily basis, including: protein, amino acids, essential amino acids, nitrogen, collagen, lipids, fatty acids, essential fatty acids, manganese, calcium, phosphorous, potassium, magnesium, iron, copper, cobalt, zinc, sulfur, sodium, and selenium.

Performance E-V is harvested from naturally raised Canadian Wapiti elk that are provided for and treated with great care and respect. The stage of antler growth and method of preparation can influence the potency activity of velvet antler. **Performance E-V** is harvested at the height of potency and optimum conditions.

Velvet antler is the only body appendage in the advanced mammal kingdom that when injured can regenerate itself. In this ability lies the power of velvet antler. Chinese scientist experimenting with how velvet antler supports life at the cellular level, suspect it is able to prevent genetic damage and extend cellular longevity, typically mammal cell lines duplicate themselves about 60 times before they die off. But research doctors at the respected Chinese Academy of Medical Sciences in Beijing have found the nutrients in velvet antler will promote cell replication up to 180 times. This suggests why velvet antler creates the sensation of rejuvenation when taken by both men and women.

Athletes across North America abuse anabolic steroids in order to maintain high testosterone levels in their bodies. **Performance E-V** is a natural food supplement that provides a similar effect without the harm of artificial chemicals. It would be good news to athletes if they were able to obtain a natural food supplement to build strong skeletal muscles. **Performance E-V** may give athletes an opportunity to build testosterone naturally within their bodies.

Performance E-V is reported to improve libido, and might offer a real, all-natural alternative to Viagra-type chemicals. Try **Performance E-V** today, and see what it does for you!
