

Ultimate II®

Shark Cartilage

Code: 103
Package Size: 60 capsules
Suggested Use: 2 capsules daily as a dietary supplement.

The Results Are In On Shark Cartilage

Having survived virtually unchanged for many years, the shark is certainly one of the most remarkable creatures on the face of our planet. The shark appears to be the only animal with a natural immunity to cancer and practically every disease known to man. When wounded it heals quickly; it even has five sets of teeth and can form new ones if needed. The shark is also the only animal with a skeleton comprised entirely of cartilage; a tough, bone-like tissue that accounts for eight percent of its total weight. Scientists now believe it is the shark's cartilage skeleton which is responsible for this super immunity.

Researchers worldwide are investigating the shark's natural resistance to disease. There has been an explosion of medical research on shark cartilage's amazing ability.

What makes shark cartilage so special is that it contains mucopolysaccharides in a concentration one thousand times greater than found in any other type of cartilage.

Arthritis And Cartilage Research

Dr. Stephen Freedman, marine biologist and immunobiochemist at the University of Utah, is particularly interested in the anti-inflammatory aspects of shark cartilage. These properties are in addition to its angiogenesis inhibiting ability and are produced by powerful anti-inflammatory molecules called mucopolysaccharides. Dr. Freedman cites exciting scientific research on using shark cartilage supplements in the successful treatment of arthritis. These experiments were conducted in Belgium and by Mote Labs in Florida and were overwhelmingly effective in relieving joint pain and inflammation.

A dozen elderly arthritic patients with severe knee pain were treated with shark cartilage by Dr. Joseph Orcasity, M.D., a consultant at the University of Miami Medical School. He reported that after four weeks of taking shark cartilage, most patients exhibited reduced pain and swelling and greater mobility.

Dr. Allen Pressman, a prominent sports nutritionist, routinely uses shark cartilage in his healthy and active patient population as an adjunct in the treatment of low back joint pains. He reports that using shark cartilage as a treatment is becoming widely accepted in the medical community. In his acutely injured patients he finds an almost immediate reduction in pain and swelling and a marked increase in the range of limb motion.

Clinical Uses

The current medical literature contains much scientific evidence that shark cartilage is a tremendously effective treatment in many degenerative and inflammatory conditions. Amazingly, we look to one of earth's oldest and most feared creatures to provide the means to treat or ameliorate many of our most devastating and enigmatic diseases.

Testimonies

I am a 51-year-old male and I have rheumatoid arthritis. In April of 1994 I was almost a cripple. I was in so much pain it hurt to breathe deep breaths. I had spent thousands \$ on doctors and medication and was constantly getting worse. I started taking 3 AP-300 and 8 Shark Cartilage and 2 AnOx daily the 28th of April in 1994. By the end of May my rheumatoid arthritis was in total remission, no pain, and I feel great and have plenty of energy. Life is wonderful again.

In Jan. of 1995 I also started taking 4 Avengers daily. In a very short time I noticed that every time I took a shower there was no hair on the drain. Also, in four months I noticed that most of my gray hair is turning back to its original color. My skin has become healthy and smoother. I feel and look 20 years younger. There is no way to thank you enough for the wonderful products. I told my friends and family about the products. And now I am getting paid to feel good and be healthier.

Thanks a ton,
Bracy Mathis

Thank you for your wonderful product Ultimate II, shark cartilage concentrate!!! I have been taking it for about six weeks now. Before I was taking Ultimate II, I was taking cortisone regularly to ease the pain of my arthritis.

My arthritis got so bad it forced me to retire from a thriving dog grooming business. My joints and muscles are effected, which makes it twice as painful. I have even had to go into the hospital as long as a week at a time.

Since taking Ultimate II, my joint and muscle pain is gone. I can grip again, I don't ache all over when breathing, and I can get around and live a normal life. One of the greatest blessings is that I can play my piano again. I praise God daily for Ultimate II.

Gratefully yours,
Lenora - Arkansas

P.S. Not only has it taken the pain away, it does it without the pain and the side effects of the cortisone shots. It is also much more affordable and convenient.

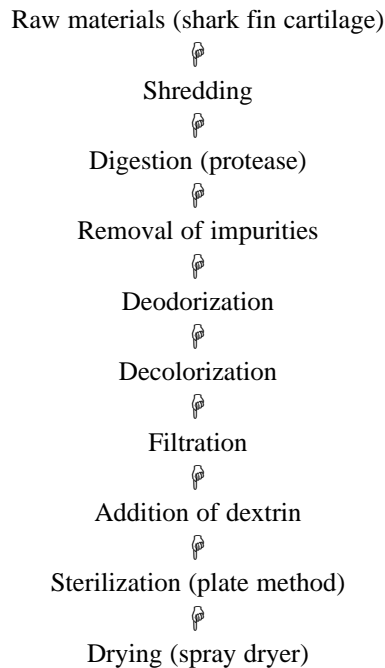

Typical Analysis

We believe ULTIMATE II Shark Cartilage Concentrate is superior to ordinary shark cartilage powder due to its high mucopolysaccharide content, low ash and fat, and high solubility. Because of the deodorization process our shark cartilage is more desirable to take.

Loss on Drying	4.0%
Protein	26.0%
Lipids	0.15%
Residue on Ignition	3.0%
Mucopolysaccharides	21.5%
Dextrin	45.0%

For♦Mor's Ultimate II Shark Cartilage Concentrate is manufactured from 100% shark fin cartilage. Ultimate II Shark Cartilage Concentrate contains high levels of mucopolysaccharides and proteins and low levels of ash and lipids.

The manufacturing process is as follows:

We suggest that when you have someone using a capsule larger than our 250 mg Ultimate II Shark Cartilage Concentrate, get them to compare results by taking the same dosage from the capsules that are larger than our Ultimate II. You will find in most cases our 250 mg will out-perform the larger ones, making Ultimate II very competitive even with direct mail order marketers.
